SUMMARY

BS Information Technology graduate with hands-on experience in software development, Python programming, database management, and data analytics through internship and academic projects. Experienced in developing web applications, integrating APIs, and working with SQL databases while applying analytical thinking to solve technical problems. Passionate about building scalable software solutions and continuously learning modern technologies.

EXPERIENCE

SOFTWARE DEVELOPER INTERN

JAN 2026 - APRIL 2026

Cocogen Insurance, Inc.

- Contributed to the development and maintenance of a CMS platform using Laravel and Next.js, implementing secure authentication and CRUD functionalities across multiple administrative modules.
- Developed and enhanced responsive UI components, navigation flows, and a dynamic customer inquiry module with conditional forms and input validations to improve user experience.
- Assisted in API integration and CTPL API simulation testing using Postman to validate system functionality and emulate external LTO response structures.
- Collaborated with the development team on debugging, feature enhancements, and Git-based version control workflows to support reliable and maintainable software delivery.

PROJECTS

BUSINESSFLOW LITE — FULL-STACK BUSINESS MANAGEMENT PLATFORM

Next.js 16 · TypeScript · Tailwind CSS · Prisma ORM · PostgreSQL · Auth.js

- Developed a full-stack business management platform featuring secure authentication, inventory management, sales tracking, real-time dashboards, and responsive UI using Next.js, TypeScript, Prisma ORM, and PostgreSQL.

WASTEWISE — RECYCLING & COMMUNITY IMPACT PLATFORM

React · Django · Firebase · Firestore · Chart.js · Google Maps API

- Developed a data-driven web platform that promotes sustainable recycling through real-time community impact dashboards, data visualization, location-based services, and analytics using React, Django, Firebase, and Chart.js.
